

1G EPON equipment for cloud computing

Overview

ONU1710-1G is designed to provide efficient PON solutions for FTTH/O networks. It adopts small size and lightweight design, flexible in deployment and saves space. PON (Passive Optical Network), as an access network technology, can implement fiber optic to the home, satisfying the high-bandwidth requirement of the "last kilometer" in the access layer network. The PON technology includes:

- Ethernet PON (EPON), a passive optical network based on Ethernet, is.
