

## Adjustable Attenuator Group

## Adjustable Attenuator Group

Over 400 attenuator models for 50-Ohm & 75-Ohm system including fixed, high-power, digital step / programmable, voltage variable and more! Stocked for shipping.

This device provides a variable fine control attenuation in a very wide frequency range and widely used in electronic equipment. RF attenuators divided in fixed and adjustable.

Adjustable Attenuator 536x is a family of variable passive waveguide attenuators based on ACST high-precision manufacturing technology. Covers range of frequencies from 50 to 500 GHz. Exhibits flat ...

Designed for ease of integration into commercial, industrial, and military RF/microwave systems, these compact, high-quality coaxial components include attenuators, phase shifters, DC blocks, couplers, ...

We offer a robust portfolio of in-stock, adjustable RF attenuators and phase shifters for multiple applications, including test instrumentation, cellular communication, wireless communications, ...

Unlike the digital attenuator, this attenuation range is a continuous function of VC, so that any and every attenuation between the minimum and maximum values can be selected.

ADIsimRF is an easy-to-use RF signal chain calculator. It calculates Cascaded Gain, Noise Figure, IP3, P1dB and Power Consumption. The number of stages can be varied up to a maximum of 20. Stages ...

Variable RF attenuators reduce signal strength while preserving signal integrity, making them crucial in RF testing and system protection. They provide adjustable attenuation to control power levels in ...

Explore RF attenuators: fixed, variable, chip, connectorized. Understand specs like frequency, attenuation, power, impedance. Discover their benefits in signal control, impedance matching, and ...

Built to handle high power and harsh environments, our attenuators help prevent overload, reduce reflections, and maintain system performance without compromise.

Over 400 attenuator models for 50-Ohm & 75-Ohm system including ...
