

Bulgarian Consulting Cabinet Cold Aisle Waterproof Type

Overview

Disclosed is a waterproof structure of a cold aisle cabinet. An information communication cabinet refers to a case or a cabinet used for integrated loading of various communication apparatus, and is generally made of high quality cold rolled steel plate. The equipment is kept at an effective temperature. Designed to your specification, it can be custom configured to fit any white space layout, enabling a precise. Beyond implementing basic measures such as sealing moisture out of the data center and improving air flow, aisle containment to prevent the mixing of hot and cold air stands out as a method that can dramatically reduce energy costs, minimize hot spots and improve the carbon footprint of data. The aisle containment system is a modular rowbased thermal containment solution, which separates cold and hot data center air streams to and from equipment. It manages airflow at the source, increases the cooling efficiency and significantly lowers down operating costs. Row level thermal. Cold aisle containment creates an enclosed corridor in front of server cabinets, ensuring that the coldest air goes directly into equipment intakes.
