China West Asia Tower Communications Command Center

China West Asia Tower Communications Command Center

We will do so in part by opening a wider range of military-to-military communications with the PLA with a focus on strategic stability as well as deconfliction and de-escalation, more broadly. We...

China is undertaking a landmark military infrastructure initiative on the outskirts of Beijing, where it is constructing what analysts believe may be the largest military command complex in the world.

The latest is a wartime military command center that could surpass the size of the Pentagon. It is planned to be the world's largest military command center—at least ten times the size ...

Last year, the command conducted 120 joint exercises, 20 of which were significant exercises with allies and partners. "Though we face serious challenges, the joint force remains ...

"China's main secure command center is in the Western Hills, northeast of the new facility, and was built decades ago at the height of the Cold War," a former U.S. intelligence official...

Fresh analysis indicates a hardened, underground complex southwest of Beijing that is far larger than first reports suggested—and built to keep command functioning under extreme stress.

The facility includes an above-ground headquarters building and a deeply buried command center designed to survive nuclear strikes. A new facility, reportedly ten times the size of ...

CASI's mission is to advance understanding of the capabilities, development, operating concepts, strategy, doctrine, personnel, organization, and limitations of China's aerospace forces, ...

Fresh analysis indicates a hardened, underground complex southwest of Beijing that is far larger than first reports suggested—and built to ...

Satellite images reveal a 1,000-acre military infrastructure project near Beijing that reshapes the strategic balance in Asia and raises concerns among ...

China is building a massive military command center that's 10 times the size of the Pentagon. Intelligence analysts say it's likely designed to protect China's top officials from a nuclear...

Satellite images reveal a 1,000-acre military infrastructure project near Beijing that reshapes the strategic balance in Asia and raises concerns among Western powers.
