

Do you need a good router to install fiber optic cable

Overview

While you don't necessarily need a special router for fiber optic internet, having a router that is optimized for fiber optic connections can provide faster speeds, lower latency, and a more reliable connection. Most fiber ISPs, including Mercury, provide an ONT that connects directly to your router via an Ethernet cable. However, not all routers can create a Wi-Fi network if it's not fiber-ready. The technician powers, tests, and activates the connection to confirm full speed and signal quality. * For larger homes, mesh.

Do you need a good router to install fiber optic cable

We've done the research for you and put together this in-depth ...
