

Features of Wide-Temperature Industrial Switches

Overview

Industrial switches, such as the Baudcom BD-S2124FSP, are engineered to operate reliably across a wide temperature range (e., -20°C to +55°C), making them suitable for installation in unheated warehouses, outdoor cabinets, or on sweltering factory floors. The temperature switches program includes temperature controls for general industrial as well as light industrial applications, controlling air and water. The components are reliable electromechanical controls, based on more than 80 years of experience. It is fabricated with Honeywell's dielectrically isolated high temperature HTMOSTM linear process, and is.
