

Fiber optic internet connection cannot access the router

Overview

If the status light ring is off (no color), it means your router is not connected to the network. The most common causes of this are loss of power to the fiber terminal (ONT) or an unplugged network cable. Make sure you have an Ethernet cable plugged fully into the WAN port. The principle is simple: by cutting the power and then restoring it, you force the devices to reset their internal processes and re-establish their connections. Fiber optic internet delivers blazing-fast speeds and reliable connectivity, making it a top choice for modern homes and businesses.

Fiber optic internet connection cannot access the router
