

Fiber optic sensors for Irish drilling rigs available now

Fiber optic sensors for Irish drilling rigs available now

With rapid data interpretation available on-site or remotely, our specialists - or your own team - can quickly and confidently diagnose wellbore issues, including leaks, cement assurance, injection ...

This article explores the communication challenges the oil and gas industry faces and how fiber optic technologies, including solutions from Nokia and Infinity Technologies, help address ...

Optiq solutions can be seamlessly integrated with any existing fiber-optic infrastructure (such as in pipeline integrity monitoring) or by using our unique temporary or permanent fiber-optic deployments.

Explore how fiber optic sensing is transforming downhole monitoring for safer, more efficient oil and gas operations.

No customer reviews Product Summary: 1pc Drilling Rig Optical Fiber Sensor FTA-280-L From YUJBILTR

Iron WatchDog retrofits mining drill rigs with IoT sensors and EDR systems. Cut drilling cycles 10-30% with real-time rig telemetry in our SaaS web console. ...

After an assessment of the project requirements, Weatherford experts proposed an in-country, fiber optic monitoring system with a proven record of reliability and backed by data from a gas well completion ...
