

Georgian Optical Cable Inflatable Plugging Device

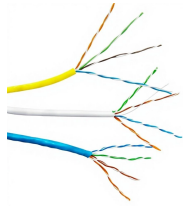

Overview

According to BBC News, the woman identified only as the spade-hacker was actually digging for copper when she accidentally struck a fiber-optic cable that links all of Armenia's internet. Adding to the peculiarity, this cable was located in the Georgian village of Ksani. The invention relates to the technical field of plugging devices, in particular to an optical cable plugging device which comprises an elastic rolling sheet, wherein the left end of the elastic rolling sheet is called a left folding end, the right end of the elastic rolling sheet is called a right. In 2011, an elderly woman in Georgia (the country, not the U.) accidentally cut off the internet for not just her own country but almost the entire nation of Armenia as well. This incident took place on March 28, 2011. Like many others in rural areas, the woman was scavenging for scrap metal, a. Just imagine, all those savvy TikTok videos that teach us how to grow lettuce from lettuce, all those crafty filters that morph our faces into odd-looking animals to the point of being completely unrecognizable — gone! Not only can an entire country lose its internet at the hands of just about. A technology for plugging devices and optical cables, applied in the directions of light guides, optics, optical components, etc. Need help?
