

How high should the outdoor unit cabinet base be

Overview

Standard base cabinet depths typically range from 24 to 27 inches, while heights are often around 34. If you want to include a built-in refrigerator unit to go with your countertop, it would be best to raise your countertop height to 38 inches or about 97 centimeters. These countertop heights will work for people with an average height of 4 feet and 6 inches to 5 feet and 8 inches. For example, a design might allocate 10 feet. Constructing outdoor base cabinets involves careful planning, precise cuts, and the use of weather-resistant materials. How big should your outdoor kitchen be?
