Choosing the right equipment will make your work faster, safer, and more accurate.

## How to cut the downward-facing elbow of a cable tray

This video shows metal fabrication techniques, DIY cable tray projects, and tips for perfect bends and joints.

It's easier to cut your rods to the perfect height before the tray is in the way. Correct size open-end wrenches are more efficient than adjustable wrenches or channel locks.

Following the advice given in this cutting guideline will lead to: increased safety and handling, reduced weight, ease of installation, improved logistics and optimal performance of products.

Position bolt cutter blades near the cross wire and perpendicular to wire to be cut (see illustration above). Proper cut will make the assembly faster, easier and safer while minimizing grinding.
