

How to set the IP address of a fiber optic router

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Make sure to update the firmware, configure Wi-Fi security, and customize your network name for optimal performance. Using an Ethernet cable, plug a computer into the LAN port on the bottom of your C5500XK SmartNID.

How to set the IP address of a fiber optic router
