

## How to set up an SPD distribution box

### Overview

Keep SPD connection leads as short and straight as possible to reduce residual voltage. A low-impedance grounding connection is essential for effective surge diversion. How close should you install an SPD to the main busbar?

What type of SPD fits most home distribution boxes?

How often should you test your SPD?

Can you use one SPD for the whole building?

You should put your SPD very close to the main busbar in the distribution box. Every building needs a careful spd layout to make sure distribution is safe and works well. A good spd layout helps panels deal with surge protection. This installation manual describes the safe installation, testing and operation of the Eaton® SPD Series Surge Protective Device (SPD).
