

How to use a mech launcher to shoot light

Overview

Just shoot the ground next to them. If there are no walls shoot to the side, your attack will increase 50% from hitting him on the side. Any tips or tricks on how to use it more efficiently and effectively?

?

I see people say you don't have to aim at them (when it's locked on), and to go to the side a bit. But when I do, it literally only hits what's in front of me or them, causing no damage whatsoever. I'm feeling like I wasted my. Links to longer explanations are on each entry as well as each category header. If you Dismount/Eject and your mech contains a system with the AI tag, it shares your turn, but neither get a fresh action pool on that turn - actions used while you were still mounted apply to both mech and pilot. It is designed to be mounted on the arm or shoulder of a mech and is capable of launching deadly discs at high velocities.

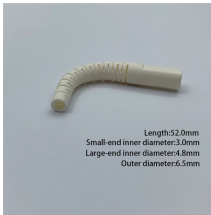

How to use a mech launcher to shoot light

Players can modify firing modes between single-shot, automatic, and burst fire, depending on the weapon type, creating tactical depth that extends beyond simple point-and-click combat. This ...

Any tips or tricks on how to use it more efficiently and effectively?? I see people say you don't have to aim at them (when it's locked on), and to go to the side a bit.

By spinning it up, the flywheel can transfer its stored energy to the ball or disc, helping shoot it towards a goal or a basket. Flywheels are simple but powerful and a great choice for Rapid Relay!!
