

Huawei core switch S7703 entry point

Huawei core switch S7703 entry point

The S7700 series switches are high-end smart routing switches designed for next-generation enterprise networks. The S7700 series can function either as an aggregation or core node on a campus ...

The document is a datasheet for the S7700 series of smart routing switches from Huawei. The S7700 series offers intelligent services like MPLS VPN, traffic analysis, QoS policies, load balancing and ...

s designed for next- enterprise networks. The S7700 design is based on Huawei's intelligent multi-layer switching technology to provide intelligent service optimization methods, such as MPLS e Layer 2 ...

The S7703 chassis provides two system power supply slots: PWR1 and PWR2, which support DC and AC power modules. PWR1 is in area A, and PWR2 is in area B. Area A and area B act as a hot ...

An S7700 running the V2R5C00 or later system software can be upgraded to an agile switch by using an X1E card, which is equipped with the first Ethernet Network Processor (ENP) of Huawei. ...

Huawei X7 Series Switches S7700 Datasheet (Detailed Version) The S7700 series switches (S7700 for short) are high-end smart routi.

The S7700 can function either as an aggregation or core node on a campus network or in a data center to provide integrated wireless access. The S7700 also offers voice, video, and data services, helping ...

The S7700 series provides four S7703, S7706, S7710, and S7712 models to support the ever-expanding switching capacity and port density through the CLOS architecture.

The S7703 switches are high-end smart routing switches designed for next-generation enterprise networks. 1. Agile features supported in V2R5C00 and later versions. 3. Hardware BFD and Ethernet ...

The built-in native AC on S7700 series switches allows enterprises to build a wireless network without additional AC hardware. S7700 switch can manage up to 4K APs. It is a core switch that provides up ...
