

# Huijue 1-to-16 beam splitter

## Huijue 1-to-16 beam splitter

Custom splitter configurations with other wavelengths, fiber types, coupling ratios, port configurations, or housing options are available, and each custom splitter includes an individualized test report.

This PLC Splitter is a 1x16, with 1 input and 16 output fibers with an even split ratio across all fibers regardless of input wavelength. PLC Splitters are available with 900µm loose tube singlemode fiber ...

We offer ABS box PLC Splitters with a wide range of styles and sizes to split or combine light with minimal loss. All splitters are manufactured using a very simple process that produces reliable, low ...

Description PLC Splitter FBT Splitter LC/UPC 1\*16 fiber polarization beam splitter ... FAQs

Beamsplitters are optical components used to split input light into two separate parts. Beamsplitters are common components in laser or illumination systems. Beamsplitters are also ideal for fluorescence ...

Our 1×16 Planar Lightwave Circuit (PLC) splitter is designed for fiber-to-the-home (FTTH), passive optical networks (PON), and cable television (CATV) applications. It ensures low insertion loss and ...

This 1×16 mini type PLC fiber optic splitter has a steel tube package that can provide strong optical fiber protection. And the splitter ends terminated with sc apc connectors, so there is not fiber splice during ...

This PLC Splitter is a 1×16, with 1 input and 16 output fibers with an even split ratio across all fibers regardless of input wavelength. PLC Splitters 1×16 are available with 900µm loose tube singlemode ...

A fiber optic splitter is a passive optical device that can split or separate an incident light beam into two or more light beams. These beams may or may not have the same optical power as ...

The 1×16 Singlemode Mini Module Blockless PLC Splitter is a compact, high-performance optical splitter used in single-mode fiber networks. It features one input port and sixteen output ports, allowing it to ...
