Indoor Communication at the Bulgarian Iron Tower

Indoor Communication at the Bulgarian Iron Tower

Turnstiles at the entrance of the tower are run through 8 PORT terminals, which simultaneously allow visitor access to the building and direct visitors to the elevator provided for them.

At the time of its demolition, the Vakarel radio tower was still the tallest in Bulgaria. The famous (or as some radio engineers would suggest, infamous) Blaw-Knox diamond-shaped tower ...

During the bombing of Sofia in 1943-44, telephone communications in the capital were severely affected. On 09.09.1944, the new government found in Sofia only one temporary city manual telephone ...

Discover the ancient communication network of Bulgarian signal towers — smoke by day, blazing beacons by night.

Infinity Tower on Bulgaria Blvd. is a modern class A office building in an extremely communicative place on the boulevard and only 5 minutes by car from the top center of Sofia and the Ring Road.

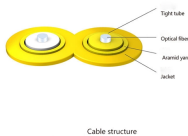

Discover the ancient communication network of Bulgarian signal towers — smoke by day, blazing beacons by night.

The wireless/radio scene in Bulgaria extends over more than one and a quarter centuries. Their first wireless experiments began in 1896, with the participation of the Post Office and the army, and their ...
