

# GDR Telecom Site Energy Systems

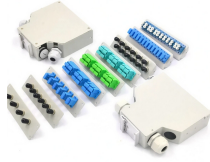

## Industrial Ion Exchanger

PRODUCTION NAME	Frequency conversion control cabinet
PROTECTION DEGREE	IP55
VOLTAGE	220/380V
SIZE	customized as required
MOUNTING WAY	Floor-standing
APPLICATION	Indoor and outdoor

## Industrial Ion Exchanger

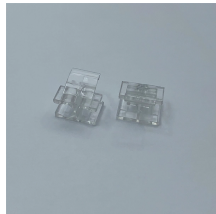

Envirogen offers tailored ion exchange (IX) solutions designed for diverse challenges—from traditional inorganics to emerging contaminants like PFAS and Hexavalent Chromium.

These vessels utilize ion exchange resins to selectively remove contaminants such as heavy metals, hardness ions, and other dissolved solids, resulting in high-purity water suitable for various industrial ...

Ion exchange systems provide a highly effective way of removing dissolved and ionised impurities in water. Our ion exchange technologies are highly adaptable systems, available in a range of ...

Our systems are designed to meet your discharge requirements, achieve the water quality level needed for reuse and recycling, and minimize the liability associated with on-site storage and handling of ...

Our solutions effectively remove 99.9% of contaminants with industrial ion exchange systems that are customizable, eco-friendly, and supported by exceptional customer service. Our systems offer a ...

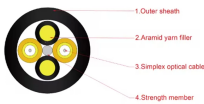

This purification technology is widely used for producing high purity water in many applications such as produced water softening in the energy industry and deionization or demineralization across many ...

Nalco Water offers a complete range of industrial water softeners and ion exchange systems. Water softeners achieve the water type you need by removing calcium and magnesium from hard water.

Sirco Industrial's CLRS ion exchange systems—automated, dual-train solutions for 100% rinse water recycling with minimal chemical use and smart monitoring.

Aries designs and manufactures ion exchange systems for a industrial and wastewater treatment, boiler makeup, semiconductor, residential softening, metals removal, product purification, food processing, ...

Chem-Aqua's manufactured ion exchange systems are designed to remove hardness and impurities, our systems protect equipment and optimize water treatment performance.
