

Installation of fire-fighting terminal distribution boxes in Syria

Overview

The proposed project consists of developing a strategic petroleum storage and distribution terminal in Baniyas, Syria, with an initial storage capacity of 200,000 cubic meters dedicated to Diesel and Gasoline products only. These sturdy solutions are certified according to global standards such as ATEX, IECEx. Installing fire fighting systems is crucial for safeguarding lives and property. We offer bespoke, custom-made terminal boxes and terminal box combinations, as well as standard products with short delivery times.
