

Integrated Emergency Power Supply

Overview

These hybrid rotary UPS designs do not have official designations, although one name used by UTL is "double conversion on demand". This style of UPS is targeted towards high-efficiency applications while still maintaining the features and protection level offered by double conversion. A hybrid (double conversion on demand) UPS operates as an off-line/standby UPS when power conditions are within a certain preset window. This allows the UPS to achieve very high efficiency ratio.

Integrated Emergency Power Supply

1~10W 220V AC LED Integrated Emergency Power Supply The LED integrated emergency power supply that suits all your emergency lighting needs. It is specially designed to suit the LED tubes and ...
