Integrated power cabinet for campus network resistant to low temp

The IsoCool ® is a stand-alone battery cooling system creating a temperature zone for backup batteries that is lower than the ambient temperature within the shelter. This lower temperature zone ensures ...

At Iceberg Climatized Cabinets, we specialize in delivering network equipment cabinets. These cabinets are designed to meet the rigorous demands of modern telecommunication and network operations.

Whether you need a compact fiber distribution unit or a large UPS enclosure, each outdoor telecom box can be configured to support integrated power, fiber optic, and data systems within our facility.

LongXing outdoor power cabinet provides flexible size options, offers the ideal enclosure solution to build the whole base station inside.

The 16U Outdoor Network Cabinet with AC Unit is a weatherproof, IP66-rated NEMA enclosure designed to protect sensitive network equipment.

Our temperature-controlled electrical cabinets feature weatherproof, waterproof designs for 19" server racks, fiber distribution & cell tower equipment. Trusted by telecom operators for reliable climate ...

This durable, outdoor network enclosure comes with a power supply that provides up to 350W (55V DC, 6.3A) of power to industrial equipment, such as PoE switches, injectors and wireless access points.

Our cabinets can be fitted with or without climate control and are engineered for efficiency, offering precise temperature regulation to prevent overheating. Whether deployed indoors or in rugged ...

This Hybrid Outdoor Telecom Enclosure is a fully integrated, weatherproof cabinet designed to house telecom power systems, batteries, and network equipment in outdoor environments.

AZE understands that you need more than a cabinet that offers a large line of secure, weather-tight outdoor cabinets, designed to house and protect a wide range of electronic equipment.
