

# **Intelligent Light Control Circuit Module**

## Intelligent Light Control Circuit Module

Intelligent panelboards for automated lighting control and improved energy efficiency. Reduce energy costs as much as 30% by automatically turning off lighting during unoccupied periods. Plug load ...

Our intelligent lighting and control solutions, which includes a large array of PIC microcontrollers (MCUs), can meet the technical needs of lighting engineers.

Omni Lighting Control system module is the core part of a full intelligent lighting control system, including power supply module, curtain control module for smart home control, and also gateway control ...

A lighting control module, often referred to as an LCM, is the brain of an intelligent lighting system. It serves as the central hub, receiving and processing information from various sensors, ...

Intelligent Lighting Control Module not only eliminates the manual operation and management of lighting in a building, but also employs a smarter way to save energy and operational ...

What is a Smart Lighting Control System? A Smart Lighting Control System is an intelligent infrastructure that manages how light sources (LEDs, fixtures, luminaires) are switched, ...

What is a Lighting Control Module? A lighting control module is the “control center” for your lighting system. It acts as a bridge between your physical lighting fixtures and the smart ...

Intelligent Lighting Controls lets you transform your environment with smart, energy-saving lighting solutions. Talk to a representative today!

Connect Digital Box is a highly flexible, configurable and intelligent lighting control module, which features a digital dimming and MLS Bus operation – for DALI ballasts.

The range includes a series of programmable Lighting Control Modules and a choice of PIR and microwave detectors each with photocells for daylight harvesting. Controls enhance any lighting ...

## Contact Us

For more information, pricing, or custom energy solutions, please contact us:
