

Is GYXTS a single-mode optical cable

Overview

The GYXTS optical cable structure is a loose tube made of high modulus polyester material with single-mode fiber or multi-mode fiber, and the tube is filled with waterproof compound. The loose tube is armored with steel wires and corrugated steel tape. For details, see naming. We manufacture high quality products according to European and US standards. The loose tube is provided with water-blocking material to ensure the longitudinal water seepage of the optical. GYXTS-20~24Xn Optic Cable is Uni-tube Anti-rodent Optical Cable, which is suitable for long-distance communication and inter-office communication, especially in outdoor environments.

Is GYXTS a single-mode optical cable

The single-mode fiber or multi-mode fiber is made of a high modulus polyester material in a loose tube, and the tube is filled with a waterproof compound. The loose tube is provided with water-blocking ...

The structure of GYXTS optical cable is a loose tube made of high-modulus polyester material for single- mode or multi-mode fiber, and the sleeve is filled with waterproof compound.

The GYXTS optical cable structure is a loose tube made of high modulus polyester material with single-mode fiber or multi-mode fiber, and the tube is filled with waterproof compound.

GYTS fiber cable is steel tape layered Loose tube cable. The structure of GYTS cable is with metal reinforcement member, loose-layer twisted type, steel-polyethylene bonded sheath communication ...

Uni-tube Anti-rodent Optical Cable (GYXTS) Single-mode/multimode fibres are housed in a loose tube that is made of high-modulus plastic and filled with tube filling compound.

Single-mode/multimode fibres are housed in a loose tube that is made of high-modulus plastic and filled with tube filling compound. The loose tube is armored with steel wires and corrugated steel tape.

VEIVOT GYXTS Fiber Optical Cable is a loose tube made of high modulus polyester material, which is filled with waterproof compound, and is made of single-mode or multi-mode optical fibers.

Description: GYXTS cable structure is to insert a single or multimode fiber loose tube, made of high modulus plastic it external wire winding layers of double-sided plastic corrugated ...

Loose tube gel-filled construction for superior fiber protection. Overall fiberglass reinforced yarn provides high tensile strength. UV and waterproof design. Applications Inter building voice or data ...
