

Israeli Electrical Distribution Box Certification and Testing

Overview

WANVE provides end-to-end certification compliance for Electrical & Electronics in Israel: regulatory interpretation, technical requirements, process guidance and solution generation — one-stop market access. The Electrical and Electronics Laboratory specializes in approving products in compliance with the safety specifications pursuant to different international standards, on the basis of the Standards Institution of Israel's special international agreements with KEMA NV of the Netherlands, CB Scheme -. For controlled electrical and electronic products exported to Israel, certification issued by the Standards Institute of Israel (SII) is a mandatory requirement for product customs clearance and legal market access. SII is an officially authorized authority in Israel for standard development. In the past 30 years, Hermon Laboratories have become Israel's largest and leading company for compliance testing and certification of electronic and electrical products. Most products must meet local standards and requirements to ensure products are safe, good quality, and fit for consumers' needs. SII is a non-Governmental Organization with a unique status spelled out by "The Standards Law of 1953". WWBridge provides a full range of services and helps our customers to.
