

Low noise of North Macedonia s dedicated power grid cable tray

Low noise of North Macedonia s dedicated power grid cable tray

This project aims to improve grid reliability, increase renewable energy integration, and advance digitalisation efforts in key areas of North Macedonia's transmission network.

Building on the NECP, on 13 June 2023, North Macedonia adopted the Just Transition Roadmap (supported by the EU and EBRD). This focusses on ensuring that the green economy transition ...

The code outlines the rights, obligations, and responsibilities of transmission system users, as well as planning and operational conditions for electricity transmission. JSC MEPSO is required to publish ...

The code outlines the rights, obligations, and responsibilities of transmission system users, as well as planning and operational conditions for electricity transmission. ...

Construction of the North Macedonia-Greece gas interconnector began July 9, 2025, with an estimated project duration of 22 months.

Paragraph 6.4.2 suggests 4 options for reducing noise in instrumentation circuits: provide physical separation from any noise source, install instrumentation cable in a magnetic conduit, use ...

To fulfil these duties, the division is structured into two units and one section, each comprised of well-trained experts dedicated to the meticulous maintenance of the transmission grid.

The potential application of acoustic meta-materials is discussed for noise reduction of power grid facilities and equipment.

A few practical methods of reducing noise will be examined in this technical article. These include a quantitative consideration of the effects of shielding, cable spacing, earthing (or grounding) ...

It presents the collected facts and an analysis of the root causes, offering a comprehensive understanding of the incident and its impact on the power system in North Macedonia and ...
