

Metal loose tube optical cable for communication

Metal loose tube optical cable for communication

Cable containing upto 4 - 12 optical fibers in water blocked loose tubes, water block glass yarn, LSZH inner sheathed, corrugated steel tape armoured (CSTA), LSZH ...

With marvelous performance of longitudinal water resistance, the tube is perfect to maintain good protection of optical fiber. It is especially designed for harsh environments, and can be used for ...

This tough rugged cable is ideal for all external environments including direct burial, tunnels and heavy-duty ducts, where need water resistant, rodent resistant, flame retardant.

Belden's Multi-Loose Tube (MLT) Cables are ideal for indoor/outdoor applications, including use in conduit, direct burial, lashed aerial and trunking applications.

The FPLTPSP is an armoured fiber optic cable that consists of a steel central strength member as its core and 6 jelly-filled loose tubes, each capable of holding up to 12 optical fibers.

METACOM Fiber optic cables are constructed with a single loose tube filled with water blocking jelly, water blocking tape over the tube giving it excellent water and moisture resistance.

This cable is made up of loose tubes of high-strength plastic with each one filled with a water-blocking compound to protect the fibers. The strength member of steel ...

Norden Multi Loose Tube Steel Wire Armoured Optical Cables are designed for long-distance communication and high-speed data transmission, making them ideal for building interconnections, ...

Cable containing upto 4 - 12 optical fibers in water blocked loose tubes, water block glass yarn, LSZH inner sheathed, corrugated steel tape armoured (CSTA), LSZH outer sheathed embedded with two ...

Gel filled multi loose tube cable with metallic armour of steel wires crown and double jacket for indoor / outdoor installation. The metallic armour provides an effective repellent for rodents (extreme ...

This cable is made up of loose tubes of high-strength plastic with each one filled with a water-blocking compound to protect the fibers. The strength member of steel wire is positioned at the center of the ...

Corning MIC® Loose Tube cables with aluminum interlocking armor utilizes 250 μm color-coded optical fibers surrounded by dielectric strength members with a flexible, flame-retardant outer jacket.
