

National Standard Thickness of Server Rack

Overview

EIA-310 is a specification for what is often called the “standard rack”. This specification standardizes several important features of 19” racks, such as the Rack Unit (RU or U), vertical hole spacing, horizontal hole spacing, rack opening and front panel width. Standardization ensures that equipment from different manufacturers fits into a common enclosure. Most professional server racks follow the EIA-310. Common server rack sizes are 19-inch width, heights like 42U or 48U, and depths from ~24” to 48”. A 42U rack provides 42 × 1.9 mm) of usable vertical mounting space. Common sizes: 42U, 48U, and compact options like 22U-27U. Standard width is 19 inches (EIA-310 compliant), while outer widths vary (e.
