

Optical Module Exports in 2023

Overview

The global active optical module market size is poised to grow significantly from USD 3.5 billion in 2023 to an estimated USD 10. Optical module demand is being pulled in two directions at once, faster bandwidth for dense networks and tighter constraints on power, security, and lead times. 1 billion by 2025 and 35 percent of manufacturers reporting lead times beyond 12 weeks, the. Datacom revenues are recovering from the Q1 drop and are poised to explode along with 800GbE shipments in 2024. Telecom revenue continues to lag, as deployed bandwidth declined YoY for the first time this quarter. Revenue market share results for companies selling Telecom, Datacom, Industrial, and. The global Optical Modules market was valued at US\$ million in 2023 and is anticipated to reach US\$ million by 2030, witnessing a CAGR of % during the forecast period 2024-2030. North American market for Optical Modules is estimated to increase from \$ million in 2023 to reach \$ million by 2030, at. DUBLIN-- (BUSINESS WIRE)--The "Optical Transceivers Market by Form Factor (SFF and SFP; SFP+ and SFP28; XFP; CXP), Data Rate, Wavelength, Type, Distance, Protocol, Application (Data Center, Telecommunication), and Geography - Global Forecasts to 2030" report has been added to. Demand for

optical connectivity started to decline in the second half of 2022 and this created excess inventories across the supply chain. The market outlook for 2023 was really gloomy six months ago. Key growth factors include the surging demand for high-speed data transfer, the escalating.

Optical Module Exports in 2023

Demand for optical connectivity started to decline in the second half of 2022 and this created excess inventories across the supply chain. The market outlook for 2023 was really gloomy six months ago. ...

The Optical Modules market size, estimations, and forecasts are provided in terms of output/shipments (K Units) and revenue (\$ millions), considering 2023 as the base year, with history ...

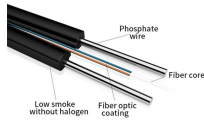

With more European and American enterprises re-entering the optical module manufacturing sector, the competitive landscape in the high-end market appears to be undergoing a ...

In 2023, in terms of value, Asia-Pacific is expected to account for the largest share of the optical transceivers market, followed by North America, Europe, Latin America, and the Middle East & ...

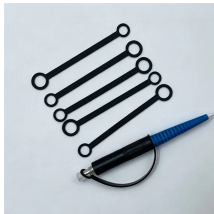

Recently, LightCounting, a market research institution in the optical communication industry, released the latest version of the 2023 global optical module TOP10 list.

In 2023, the global production of optical modules using vertical-cavity surface-emitting laser (VCSEL) technology increased by 25% compared to 2022, due to demand from consumer electronics.

The good news, according to LightCounting, is that optical component and module sales should grow 14% this year, despite supply chain issues and macroeconomic uncertainty.

Forecasts for revenue and component unit shipments for 2023-2027. A detailed listing of the product categories and companies tracked can be found on the Optical Components report page.

The global active optical module market size is poised to grow significantly from USD 3.5 billion in 2023 to an estimated USD 10.8 billion by 2032, reflecting a compound annual growth rate (CAGR) of 13%.
