Ordinary optical cable installation price

Overview

Fiber optic cable installation costs average $4,500 for most homeowners, with most installations ranging from $1,500 to $7,000. The installation type you choose and the layout of your property determine the total labor and materials needed for your project. Single-mode fiber costs less per foot than multimode fiber, but it requires more. The cost per foot of fiber optic cable is now the lowest it's been since 2021. Labor dominates the installed price. Main cost drivers include cable grade (indoor vs outdoor, armoured), distance, and labor for trenching, splicing, and termination. This guide presents ranges in USD and practical price estimates to help. This guide breaks down everything you need to know before starting your fiber installation project.
