A power distribution box is disclosed. The power distribution box may include a housing including one or more panels. The one or more panels may define a cavity. The power distribution...

The present invention provides a distribution box including a box body, a cover plate, and at least one guiding rail, wherein the box body has an opening, a plurality of side plates, and a base plate.

TECHNICAL FIELD This application relates to the field of communications device technologies, and in particular, to a circuit breaker and a power distribution box.

Example electrical boxes include a lid, a base, and side walls. The lid includes a lid structure comprising a lid upper surface structure and a lid lower surface structure.

A power distribution box is disclosed. The power distribution box includes one or more continuous-powered receptacles and a plurality of power-alternating receptacles. The continuous ...

It summarizes the technical point description of the patent document. All the components are in one box. Some of these components are high-voltage components and some are low-voltage ...
