# S12700E-8 Core Switch

## S12700E-8 Core Switch

Designed with an industry-leading distributed switching architecture and built on Huawei's high-performance chipsets, CloudEngine S12700E provides compelling features such as high-quality ...

S7700& S8700& S9700& S12700& S16700 Series CloudEngine S12700E-8: Access product manuals, HedEx documents, product images and visio stencils.

By using a next-generation cell switching architecture, CloudEngine S12700E ensures non-blocking service data forwarding on core nodes and guarantees service quality in high-concurrency, large ...

The S12700E-8 provides slots PWR1 to PWR6 for power modules, as shown in Slot distribution in the S12700E-8 chassis (front). The S12700E-8 series switches support three redundancy modes of ...

CloudEngine S12700E utilizes high performance chipset to deliver industry-leading single-slot bandwidth and 100 GE port density. Discover non-blocking switching and zero packet loss with advanced cell ...

The S12700E series switches provide large routing tables for metro core layer of television broadcasting or education network and fine granular traffic statistics collection for education campus networks and ...

For details about updates of features, commands, alarms, and MIBs, log in to Huawei enterprise technical support website, choose Software Download > Switch > Campus Switch, and select the ...

Datasheet Huawei CloudEngine S12700E series switches are new core switches designed for next-generation high-quality campus networks. These purpose-built switches help create a campus ...

The document is a datasheet for Huawei's CloudEngine S12700E series switches. It describes the switches as new core switches designed for high-quality campus networks.

With this technology, a physical network with core/aggregation switches, access switches, and APs can be virtualized into one logical switch, offering the simplest network management solution.

## Contact Us
