

## Smart Energy in Southern Europe

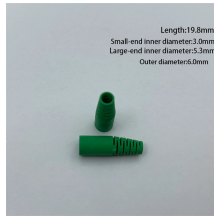

### Overview

Southern Europe, with its abundant solar and wind resources, is uniquely positioned to become a powerhouse of renewable energy. We integrate consumer-driven solutions in the clean energy system by unlocking demand-side flexibility. Our mission is to create opportunities for every company, building, and vehicle to support an increasingly. The European Commission supports various energy transition initiatives focusing on smart grids, energy storage and digitalisation. The initiatives presented below have their own websites covering information, publications and other useful links related to them. Bridge is a European Commission. The world's largest solar-powered boat, "MS Turanor PlanetSolar" sails through the Corinth Canal near the town of Corinth on July 28, 2014. The boat arrived to Greece as part of a joint archaeological project focused on underwater exploration off one of Europe's oldest human occupation sites, the. The Energy Transition Summit Madrid will take place on June 3, 2026 MADRID (AURORA ENERGY RESEARCH)— Aurora Energy Research, the global power analytics provider, is hosting the Energy Transition Summit Madrid on June 3 in the Spanish capital. Aurora Energy Research's first-ever summit for Southern Europe served as a critical forum,

underscoring a unified commitment. The European Technology and Innovation Platform on Renewable Heating and Cooling (RHC-ETIP) hosted the Southern Europe Regional Roundtable on December 10th, 2024, addressing the pressing question: "How can Southern European countries achieve 100% renewable heating and cooling?"

".

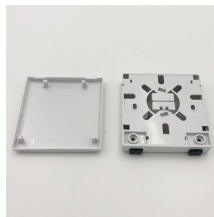

## Smart Energy in Southern Europe

This roundtable brought together key stakeholders from Southern European countries and speakers from Portugal, Spain, Italy, Greece, Bosnia and Herzegovina, Serbia to explore ...

At the heart of the project are five Business Cases, each demonstrating real-world applications of smart energy solutions —from optimising solar self-consumption in Germany to ...

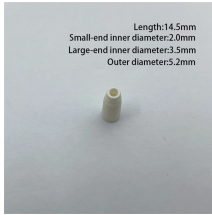

As the continent continues to try to switch to renewable energy, ...

The European Commission supports various energy transition initiatives focusing on smart grids, energy storage and digitalisation. The initiatives presented below have their own websites covering ...

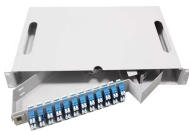

This is Aurora's first summit for Southern Europe and adds to its already established conferences globally. The summit will bring together industry leaders to discuss the future of energy and electricity ...

smartEn is the European business association of the Flexible Demand Management Industry. We integrate consumer-driven solutions in the clean energy system by unlocking demand-side flexibility.

As the continent continues to try to switch to renewable energy, Greece and Cyprus are taking an ambitious and perhaps more intelligent, balanced and cautious approach.

This roundtable brought together key stakeholders from Southern European countries and speakers from Portugal, Spain, Italy, Greece, Bosnia and ...

This paper centers on modeling renewable energy consumption in the advanced economies of the European Union, with a primary focus on evaluating the impacts of smart ...

Aurora Energy Research's first-ever summit for Southern Europe served as a critical forum, underscoring a unified commitment to scaling up clean energy and enhancing grid flexibility across ...

The research presented in this paper adds to the body of literature on how to govern the energy transition at a local level, and contributes to filling the gap on the role of multi-stakeholder ...

This roadmap explores the main challenges hindering the adoption of smart energy services, across five diverse Business Cases, ranging from residential heating optimisation to decentralised energy ...
