Solutions for optical modules on switches

OCS (Optical Circuit Switch) is an all-optical switching technology designed to establish and manage optical paths between nodes in optical networks.

As a worldwide provider of high-performance network products and solutions, FS offers switches, optical transceivers, cabling systems, and management software ...

CPO switches shorten the electrical signal path, reduce power consumption, and decrease the number of pluggable modules by co-packaging optical modules with ...

We offer a large range of LXI Ethernet and PXI & PXIe optical switching solutions which include 1x2, 2x2, 1x4 and 1x8 configurations, and our switch modules are available with a wide choice of ...

Together, the 400G/lane optical DSP and 400G EML/PD enable optical module manufacturers to deliver cost-effective, low-power 1.6T transceivers. More importantly, this ...

CPO switches shorten the electrical signal path, reduce power consumption, and decrease the number of pluggable modules by co-packaging optical modules with switch chips, while improving link ...

Today, data centers use a separate approach for optics and electronics, in which optical modules are connected to switches and routers through high-speed electrical interfaces.

Everything you need to build an optical network from end-to-end. Thin-film filter and PLC based AWG for multiplexing, a full suite of components for optical amplification use, optomechanical or MEMS-based ...

In summary, Broadcom's solution is a single-package switch with optics embedded, whereas NVIDIA features a novel package with removable photonics modules. The spectrum-X CPO ...

Optical switch solutions, built on industry-leading fourth-generation VIAVI technology, come in multiple formats, including matrix switches, 1XN and 2XN for up to 176 ports. VIAVI also offers a range of ...

Our optical networking product portfolio provides high-performance, reliable, and scalable optical control and power solutions to address high bandwidth and small form factor modules in both ...
