Overview

The 2 core XLPE cable is referred to as IEC60502 CU/XLPE/PVC 0. The circular conductor is applied for the size below 16mm^2 and the shaped conductor is applied for the size above and including 35mm^2 . I now want to upgrade the system so there are 2 lights, and 2 power points and get it re-connected. Both these. Hopefully marking the sockets will help prevent the lighting circuit being overloaded by portable room heaters/coolers! Talking to "the locals" it appears that this is common practice in Spain! We in the UK gave that up in the 1960s. But even before that we identified low-power sockets by making XLPE insulated 2 core power cables are normally used in power transmission and distribution systems. I have a good understanding of building electronics so I'm finding electrical principles easy to understand. This my plan, which I have tried to make as simple as possible. So in total I have seven circuits. The electricians turn up same-day, charge about.

Spanish wiring unit 2 cores

Normally, in older Spanish wiring you've got flat 2-pin sockets which are only meant for light appliances and then you'll have recessed Schuko (earthed) sockets which are meant for up to ...

Cut off the old UK plug from the trailing socket and wire up the Schuko. You can now safely plug in all you need without the risk of mechanical damage to the Spanish socket.

Can anyone explain in simple terms how an idiot like me can wire this switch properly. I'll have 3 core coming in to the switch and 3 core going out of the switch

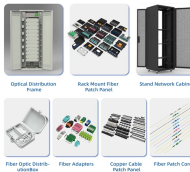

It's true that many circuits can be a bit haphazard, but the internal wiring is generally good. My place has a 12-way CU, and it's a small, 2 bed apartment, with separate radials for washing ...

Cable cores with 200 pairs. The main units are identified by numbered bindings.
