

## Specifications of China-Africa Well Logging Optical Cables

### Overview

Working temperature: heat grade is divided into: room temperature cable (-30~150 C), high-temperature cable (-50~260 C). Shielding: total shielding and split phase Shielding plus total shielding. OEM solutions are widely available with many custom options to fit your specific surveying needs. Look for solutions with a focus on wholesale supply and what the top industry distributors. A logging cable is a critical component in data acquisition systems, responsible for transmitting sensor data, operational logs, and system diagnostics from industrial equipment to monitoring or storage devices. solutions accommodate depths up to 6,000 meters for minesweeping, antisubmarine warfare, sonar, and geophysical applications.

## Specifications of China-Africa Well Logging Optical Cables

These robust cables are used with mobile closed-circuit TV inspection systems to explore subterranean sewer lines and storm sewers and are offered in multiconductor and armored coaxial constructions.

It includes specifications for 27 different cable types listing details like nominal diameter, maximum temperature rating, breaking strength, weight, and number of armor wires.

The logging cable acts as a conductor for electrical signals to and from the sonde to the surface. Furthermore, logging cable is a form of downhole cable which is used for monitoring well in the oil ...

"Wanquan" special cable has passed American Petroleum Institute (API), certification HSE certification, CCC certification, and obtained the production license. "Wanquan" product exports to the United ...

Looking for Well Logging Cables factory in China? This page lists manufacturers of quality Well Logging Cables, find out more by clicking logging cable, well logging cable, cable with competitive price.

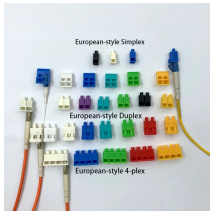

Well logging cables are an essential component of the oil and gas industry, used to transmit data from downhole instruments to the surface for analysis. Here are some of the technical features and ...

These double-armored cables containing multiple conductors in various gauge sizes and constructions are customized for use in oceanographic exploration and are optimized for use in underwater ...

These double-armored cables containing multiple conductors in various gauge sizes and constructions are customized for use in oceanographic exploration and are ...

In drilling operations, our logging cables are used for real-time monitoring of wellbore conditions, including temperature, pressure, and fluid flow. They ensure safe and efficient drilling by providing ...

Shop high-quality logging cables for geophysical and well logging. Durable, armored, and suitable for harsh environments. Perfect for oil and gas exploration.
