

## Specifications of Fiber Optic Cable Spare Racks

### Overview

It enables fiber splicing, termination, and patching in a single compact unit. The Rack Mounted Optical Cable Terminal Box is a metal enclosure used for fiber cables, connectors, and patch cords. Enclosures shall accommodate all Panduit pre-terminated MPO cassettes, fiber adapter panels (FAP), associated trunk cables, connectors, and patch cords, with integral cable management and bend radius control for transition to cable managers. Constructed out of aluminum. The Cross-frame for main cable reserve 50x50cm is a versatile, aluminum structure designed to neatly store and manage excess fiber optic cable in various outdoor settings. Slide out trays and removable front and back doors allow easy access to the patch bay.
