

Swedish Data Center EMS Bestselling Solution

Overview

American data center company EdgeMode has signed an agreement to secure use of a battery energy storage system (BESS) and energy management system (EMS) to make its Swedish data center more attractive to clients. EdgeMode (OTC: EDGM), an AI data infrastructure company, has signed a three-year Memorandum of Understanding (MoU) with Marviken ONE AB to enhance data center and energy storage capabilities in Marviken, Sweden. The strategic collaboration aims to increase grid connection capacity and integrate. Now an immensely popular data centre location in the Nordic region, Sweden is currently undergoing a period of rapid growth, according to Research and Markets. At Scandinavian Data Centers, we build resilient, high-capacity data centers that seamlessly integrate into a broader ecosystem. Click on a market below, to explore its data center locations. Save the trouble of contacting the providers yourself, check out our Quote Service.
