

Technical briefing on the installation of floor distribution boxes

Overview

In this guide, we'll break down everything you need to know to install a distribution box correctly and confidently. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. Check for proper IP/NEMA ratings and material quality. Disconnect power to the circuit on which the Floor Box is being installed before installation. Locate desired position in room for the Floor Box installation. Carpet squares need to be laid in position if not pre-attached to the panel, and an 8" x 6" [203mm x 152mm] opening needs to be cut over the opening in. FOR USE WITH ALL TYPES OF FLOORING INCLUDING WOOD, TILE, VINYL, TERRAZZO, CARPET, AND CONCRETE. It takes the incoming power and safely distributes it to different circuits throughout your building. POSITION DIVIDER ASSEMBLY IN BOX BEFORE INSTALLING GANG PLATE ASSEMBLY. * GAP FILLERS ARE OPTIONAL, PER DESIRED.
