

The fiber optic box has a signal but the router has no network

Overview

If the status light ring is off (no color), it means your router is not connected to the network. The most common causes of this are loss of power to the fiber terminal (ONT) or an unplugged network cable. Your ONT is typically located in your garage, basement or outside your home within a few feet of your home's power box. Make sure you have an Ethernet cable plugged fully into the WAN port on the back of the. When issues like signal loss, slow speeds, or intermittent connectivity arise, systematic troubleshooting is key. This guide will walk you through diagnosing and resolving common fiber network issues efficiently. All this might sound overwhelming and techie but whether you're a tech novice or a seasoned user, these bite-sized steps will help you to identify. Your fiber optical network terminal (ONT), modem, or gateway provides LEDs letting you know the status of your internet (wide area network, or WAN) and home network (local area network, or LAN) connections.
